Industrial designer and hardware engineer in San Francisco. I take products from early prototype through engineering validation and manufacturing, and I've founded and run a hardware company of my own.

Experience

Sabi
Palo Alto, CA · 2026 – Present

Hardware Engineer & Industrial Designer

Taking product concepts to production-ready hardware: rapid prototyping, engineering validation, design-for-manufacturability, and supplier coordination to de-risk development and time to market.

Daylight Computer Co.
San Francisco, CA · 2025 – 2026

Hardware Engineer & Industrial Designer

Worked across ergonomics, materials, reliability testing, and scalable production methods with cross-disciplinary teams to turn human-centric insight into a premium consumer device.

zaptrack
San Francisco, CA · 2024 – 2025

Founder & CEO

Built and led an autonomous agricultural robotics startup for organic farming. Piloted mowing robots across two acres of California almond and stone-fruit orchards and secured letters of intent worth roughly $50K/month.

Founders, Inc.
San Francisco, CA · 2024

Hardware Contractor

Helped an early hardware-AI startup scale prototype production for LLM-powered consumer products.

P&G Procter & Gamble
Cincinnati, OH · 2022 – 2023

Industrial Design

Developed working prototypes for consumer testing using 3D printing and electronics, contributing to home & fabric care upstream research and development.

sensio
Cincinnati, OH · 2022

Industrial Design

Designed a modular-size smart ring for a medical and lifestyle design start-up, exploring materials and forms alongside the engineering and business team.

Education

University of Cincinnati
Industrial Design · 2020 – 2024

Bergische Universität Wuppertal
Product Design & Manufacturing Abroad · 2023

Inventure Academy
Design, Sciences & CS · 2018 – 2020
